Richard is born and raised in Stockholm, Sweden, and brings a diverse background to the table. With a history as an elite team sports athlete and expertise as a senior software engineer, he excels in the field of web development, specializing in frontend work. Richard's lifelong passion for computers and his talent for crafting innovative solutions make him a valuable asset in any project he undertakes.

In his professional journey, Richard has developed a strong interest in the world of business. He has gained a knack for prioritization and a talent for seeing the bigger picture. Richard firmly believes in making decisive, iterative, and data-driven decisions to make progress and understand user preferences.

Richard thrives on collaboration and cherishes the opportunity to learn from teammates with different perspectives and experiences. He has a proven record of mentoring others and looks forward to assuming leadership roles in the future. With his helpful, down-to-earth, and easy-going personality, he creates an environment where everyone feels supported and valued.

## EXPERIENCE

### Consultant at Annevo

Software Engineer, Sep 2022 - Ongoing

**Telia**

Richard is a a member of Telia's GIS team, contributing as a Fullstack Developer with a primary focus on frontend development. His team plays a critical role in supporting Sweden's essential infrastructure.

Leveraging modern web technologies, he develops responsive and interactive features that enhance overall functionality. Through active participation in code reviews and quality assurance processes, they uphold high standards.

*JavaScript, React, Node.js, Typescript, Redux, Github Actions, Sass, OpenLayers, Bitbucket, Terminal, Yarn, Npm, Git, SPA, Webpack, Babel, HTML5, CSS3, React-testing-library, TDD, Github, Agile methods, Jest, UNIX, Responsive web design*

## Trustly

Software Engineer, Mar 2021 - Sep 2022

At Trustly, Richard was part of a team that owned everything related to the end-user checkout and the supporting services required for it. Their responsibility included maintaining, supporting, introducing new features, and distributing the checkout and supporting services.

Working on this product has taught him the importance of responsibility, specifically towards a product utilized by several thousand users with transactions conducted every day. The team worked together closely, emphasizing communication, helpfulness, and transparency in order to ensure the checkout was operational without any glitches or bugs.

*JavaScript, React, Node.js, Typescript, Styled components, Redux, Docker, Grafana, Github Actions, NginX, Istio, K8s, Sass, Terminal, Git, SPA, SSR, Yarn, Npm, Webpack, Babel, HTML5, CSS3, Github, CI/CD, CLI scripting/Automation, React-testing-library, TDD, Splunk, Agile methods, Jest, Microservices, UNIX, Responsive web design*

## Consultant at Forefront Consulting

Software Developer, Jan 2020 - Mar 2021

**Svenskt Näringsliv**
At Svenskt Näringsliv, Richard was part of a small team where he had the sole responsibility for frontend development. He played a crucial role in the development and maintenance of two websites, svensktnaringsliv.se and arbetsmarknadsnytt.se. Collaborating closely with stakeholders and backend developers, he ensured the

successful implementation of frontend components and optimized the websites for optimal performance.

*Javascript, React, Redux, Sass, GraphQL, Terminal, Yarn, Git, SSR, Webpack, Babel, HTML5, CSS3, Bitbucket, CI/CD, Agile methods, Responsive web design*

### Bonava

At Bonava, Richard was a Frontend Developer in a larger team, which had the ownership of Bonava's interactive "find your home" website. By leveraging his expertise in frontend technologies, he created engaging and user-friendly interfaces, ensuring a seamless browsing experience for prospective homebuyers.

*Javascript, React, Episerver, Sass, Terminal, Yarn, Npm, Git, SSR, Webpack, Babel, HTML5, CSS3, Azure Devops, Agile methods, Responsive web design*

## Consultant at Frost Experience

Software Developer, Oct 2016 - Jan 2020

### Pedagogpoolen

As the sole Frontend Developer at Pedagogpoolen, Richard had the exciting responsibility of digitalizing the company's well-established 20-year-old business idea. His focus was on developing the frontend for a mobile app and two web applications.

Collaborating closely with designers and backend developers, I ensured the successful implementation of frontend components and the integration of robust functionalities. By leveraging modern web technologies, I contributed to the company's digital transformation, bringing their proven business idea into the digital era.

*Javascript, React, React Native, MobX, Sass, Terminal, Yarn, Git, SPA, Webpack, Babel, HTML5, CSS3, Github, Jenkins, Agile methods, CI/CD, UNIX, Responsive web design*

### Ellevio

Richard took full responsibility for the frontend development of a web application at Ellevio. The application digitalized the support team's role in managing safety for electricians in the field. He created user-friendly interfaces and integrated real-time data visualization on Google Maps and in tables. This enhanced safety protocols and improved the efficiency of the support team's operations.

*Javascript, React, Redux, Sass, Google maps API, Terminal, Npm, Git, SPA, Webpack, Babel, HTML5, CSS3, Github, Jenkins, Agile methods, CI/CD, UNIX, Responsive web design*

**Frost Experience(internal)**

Richard held full responsibility as the Frontend Developer for an internal project. Working closely with a small team, they developed a content management system (CMS) that allowed users to effortlessly create interactive books comprising text, pictures, videos, and exercises. This internal project aimed to enhance the learning experience by empowering users to incorporate multimedia elements and interactive exercises. As the Frontend Developer, he contributed to Frost Experience's goal of providing an innovative tool for creating engaging and interactive educational content.

*Javascript, Node.js, React, Redux, MongoDB, HTML, Sass, Terminal, Npm, Webpack, Git, SPA, Github, Jenkins, Agile methods, CI/CD, HTML5, CSS3, Jest, TDD, Babel, UNIX, Responsive web design*

**Sanoma**

As the Frontend Developer at Sanoma, Richard had full responsibility for developing a license and user administration system for Sanoma's newly launched e-learning project. Working in a small team, he crafted user-friendly interfaces and optimized the user experience. Additionally, he played a key role in maintaining a legacy web application, ensuring its continued functionality and resolving any issues. By successfully delivering the license and user administration system and maintaining the legacy application, he contributed to Sanoma's operations and provided users with a seamless experience.

*Javascript, Typescript, AngularJS, Angular 2, Sass, Less, Bootstrap, SPA, Terminal, Npm, Gulp, Git, Babel, HTML5, CSS3, Github, Jenkins, Agile methods, jQuery, UNIX, Responsive web design*

# EDUCATION

## Jensen Education

Web Developer, 2014 - 2016

At Jensen Education, Richard immersed myself in web development, gaining expertise in frontend and backend technologies, as well as web server management. Applying this knowledge, he successfully built an e-commerce web application. This project allowed him to demonstrate my proficiency in web development and showcase his ability to leverage both frontend and backend technologies effectively.

*Javascript, jQuery, Apache, HTML5, CSS3, Sass, Git, Terminal, CLI scripting/Automation, Python, Github, Npm, UNIX, Responsive web design*
